Greater Shepparton's
**HERITAGE
OPEN DAYS 2024**

FRIDAY 29 NOVEMBER AND SATURDAY 30 NOVEMBER

Visit your heritage **free**

Welcome to the Greater Shepparton Heritage Open Days 2024

These free days have been organised by the Greater Shepparton Heritage Advisory Committee in conjunction with Council.

The Heritage Open Days 2024 follow on from previous successful Heritage Open Days inspired by 'Open House Melbourne' when hundreds of buildings (not only heritage places) are open.

During Greater Shepparton's Heritage Open Days 2024 you can visit FREE, over 50 places of heritage and historical significance in Greater Shepparton.

Some have never been opened to the public before, and many are rarely on view.

Other familiar places will come alive as you visit and hear their stories.

Included are all the Museums and collections run by the historical societies: normally an entrance fee is charged.

Greater Shepparton has an interesting history. First Nations peoples inhabited the area prior to Europeans arriving in the mid nineteenth century who developed a thriving agricultural economy, centred on the city of Shepparton, with many service towns. Subsequent settlement has gone on to welcome people from many corners of the world.

This has resulted in a wealth of heritage places, a diverse and unique range of both buildings and sites.

The Heritage Open Days will showcase many of these.

There are three ways to visit our heritage places:

- Many venues are opening their doors for visitors to attend independently
- Bus tours
- Walking tours

You may have to make hard decisions! Getting from one place to another takes time in an extensive municipality such as ours. With careful planning you should be able to do a number of different things over the two days.

Remember: suitable footwear, water, sun protection, and watch your step at all times. Children must be in the care of an adult at all times.

Please treat these properties with respect, mindful of how generous-spirited the owners and proprietors have been in opening on these days.

For enquiries, please phone Greater Shepparton City Council Building Planning and Compliance on 5832 9370

Goulburn Weir (1891)

Just outside Greater Shepparton, but vital part of irrigation system. The first major diversion structure built for irrigation in Australia and seen as a ground-breaking 'national' scheme, it raises the river level so that water can be diverted to irrigation in the GV.

'Old pump site', Murchison

The 1885 pump was the solution of the local water authority, the United Echuca and Waranga Waterworks Trust, to the pent-up local demand for irrigation to fill its channels while a weir was still being debated. Archaeological site only.

'Big Cut'

A rarely-seen section of the Cattanach Canal (1957) cut through a rise just before the Canal enters the Waranga Basin. Here the depth of cut is the greatest on the Canal, up to 19m, resulting in impressive low cliff-like walls.
